

CHEMICAL CATALYSIS FOR BIOENERGY CONSORTIUM STAKEHOLDER LISTENING DAY

Friday, June 9, 2017 | Hyatt Regency Hotel and Convention Center, Denver, CO

The Chemical Catalysis for Bioenergy Consortium (ChemCatBio) seeks stakeholder input on promising areas for fundamental and applied catalysis work for fuels and chemicals production.

ChemCatBio leverages the unique capabilities of the U.S. Department of Energy's national laboratories to address technical risks associated with accelerating the development of catalysts and related technologies. These catalysts and technologies would enable the commercialization of biomass-derived fuels and chemicals—leading to enhanced energy security and national leadership in the global bioeconomy. Additional information can be found at www.chemcatbio.org.

Stakeholder input will be solicited on Friday, June 9, 2017, 8 a.m. to 12:30 p.m., co-located at the North American Catalysis Society Meeting (NAM25), at the Hyatt Regency Hotel and Convention Center, 650 15th Street, Denver, Colorado.
