

Catalytic Process Intensification of Bio-Renewable Surfactants Platform

Goal:

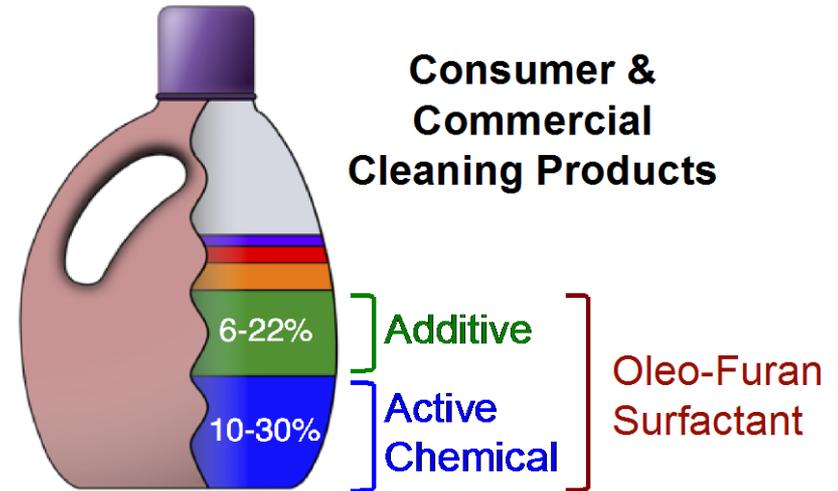

Develop catalytic chemistries and scale-up approaches for commercialization of new bio-renewable oleo-furan surfactant (OFS) technology

Approach:

Accelerated screening for catalytic improvements to core chemistries and collaborative testing for development of new surfactant structures.

Impact on the Bioenergy Industry:

Improve economics and accelerate commercialization of OFS for eco-friendly and more effective detergents

ChemCatBio Capabilities Leveraged:

- Catalyst development and screening
- Computational modeling
- Reaction engineering & process intensification
